OFFICE OF PETITIONS

In re Application of
Tino K. Adognravi
Application No. 10/707,636
Filed: December 29, 2003
Title: Beat Balls

DECISION ON PETITION

This is in response to the communication filed November 6, 2006, which is being treated as a petition to withdraw the holding of abandonment.

On April 21, 2006, the Office mailed a nonfinal Office action, which set a three month shortened statutory period to reply. The application became abandoned on July 22, 2006, for failure to submit a timely response to the nonfinal Office action.

In the present petition, petitioner requests that the Office withdraw the holding of abandonment due to nonreceipt of the nonfinal Office action.

PETITION TO WITHDRAW THE HOLDING OF ABANDONMENT

A review of the record indicates no irregularity in the mailing of the nonfinal Office action, and in the absence of any irregularity in the mailing, there is a strong presumption that the Office action was properly mailed to the address of record.

As petitioner is a pro-se applicant, the Office understands that petitioner may not keep a formal docket record system for his correspondence. Nevertheless, petitioner must provide some sort of showing explaining the manner in which petitioner receives mail from the USPTO, maintains files for patent matters, and treats mail received for such matter. Specifically, petitioner must explain the system for keeping track of patent matters - where petitioner keeps the correspondence; where he writes down due dates; how he knows replies are due, etc. In essence, petitioner must explain how he reminds himself of response due dates and show that the due date for the nonfinal Office action of April 21, 2006, was not entered into that system. Petitioner should include any available documentary evidence of the mail received, covering a reasonable period after April 21, 2006, to demonstrate nonreceipt of the

nonfinal Office action. Petitioner should also provide the USPTO with copies of any records or other methods, which could serve as a reminder of the due date for a response to an Office action, and where petitioner would have entered the receipt date of the Office action had petitioner received it (for example, a copy of the outside of a file or a calendar maintained by petitioner), if these documents are available. Furthermore, petitioner must include a statement from petitioner, or any other person at the address who may have handled the Office action, indicating that a search was conducted of the location where the correspondence from the USPTO is kept; however, the nonfinal Office action was not found. Lastly, petitioner must state that he was, in fact, residing at the correspondence address of record for a reasonable time after April 21, 2006; the period when he would have received the nonfinal Office action.

In the present petition, petitioner did not submit any statements, documentary evidence, or an explanation of his method for tracking due dates for filing responses to communications from the USPTO to show he did not receive the nonfinal Office action. Therefore, the petition to withdraw the holding of abandonment is **dismissed**. A copy of the nonfinal Office action accompanies this decision for petitioner's convenience.

Any request for reconsideration of the dismissal of the petition to withdraw the holding of abandonment due to nonreceipt of the nonfinal Office action must be submitted within **TWO (2) MONTHS** from the mailing date of this decision. The request for reconsideration should include a cover letter entitled "Renewed Petition under 37 CFR 1.181 to Withdraw the Holding of Abandonment," as well as statements and documentary evidence, as indicate above, to demonstrate nonreceipt of the nonfinal Office action. Extensions of time are permitted under 37 CFR 1.136(a).

ALTERNATIVE VENUE

Petitioner is encouraged to consider filing a petition under 37 CFR 1.137(b) to revive an unintentionally abandoned application instead of filing a renewed petition under 37 CFR 1.181.

A grantable petition pursuant to 37 CFR 1.137(b) must be accompanied by:

- (1) The reply required to the outstanding Office action or notice, unless previously filed.
- (2) The petition fee as set forth in 37 CFR 1.17(m), **\$750.00 for a small entity**;
- (3) A statement that the entire delay in filing the required reply from the due date for the reply until the filing of a grantable petition was unintentional. The Director may require additional information where there is a question whether the delay was unintentional.

A form for filing a petition to revive an unintentionally abandoned application accompanies this decision for petitioner's convenience. If petitioner desires to file a petition under 37 CFR 1.137(b) instead of filing a request for reconsideration, petitioner must complete the enclosed petition form (PTO/SB/64) and pay the \$750.00 petition fee.

Petitioner may wish to consider hiring a registered patent attorney or agent to assist in the prosecution of this application. Additionally, petitioner is encouraged to contact the Inventors Assistance Center (IAC) by telephone at 800-786-9199 or 571-272-1000, Monday through Friday from 8:30 AM to 5:30 PM (EST). The IAC provides patent information and services to the public and is staffed by former Supervisory Patent Examiners and experienced Primary Examiners who answer general questions concerning patent examining policy and procedure.

WARNING:

Petitioner/applicant is cautioned to avoid submitting personal information in documents filed in a patent application that may contribute to identity theft. Personal information such as social security numbers, bank account numbers, or credit card numbers (other than a check or credit card authorization form PTO-2038 submitted for payment purposes) is never required by the USPTO to support a petition or an application. If this type of personal information is included in documents submitted to the USPTO, petitioners/applicants should consider redacting such personal information from the documents before submitting them to the USPTO. Petitioner/applicant is advised that the record of a patent application is available to the public after publication of the application (unless a non-publication request in compliance with 37 CFR 1.213(a) is made in the application) or issuance of a patent. Furthermore, the record from an abandoned application may also be available to the public if the application is referenced in a published application or an issued patent (see 37 CFR 1.14). DETAILED ACTION

Oath/Declaration

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

Specifically, the oath or declaration is defective because the oath/declaration does not include the signature of the inventor and the date of execution.

Drawings

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include figure number, legends or reference sign(s). See MPEP § 608.02(g).

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

(a) TITLE OF THE INVENTION.

(b) CROSS-REFERENCE TO RELATED APPLICATIONS.

(c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.

(d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or

REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a).

"Microfiche Appendices" were accepted by the Office until March 1, 2001.)

(e) BACKGROUND OF THE INVENTION.

Art Unit: 2837

(1) Field of the Invention.

(2) Description of Related Art including information disclosed under 37

CFR 1.97 and 1.98.

(f) BRIEF SUMMARY OF THE INVENTION.

(g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).

(h) DETAILED DESCRIPTION OF THE INVENTION.

(i) CLAIM OR CLAIMS (commencing on a separate sheet).

(j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).

(k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A

"Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

4. Specifically, the specification of the disclosure is objected to because it does not include the BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S). (Currently, paragraph 0001 of the specification looks more like a BRIEF SUMMARY OF THE INVENTION, not a BRIEF DESCRIPTION OF THE DRAWINGS).

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 2837

6. Claim 1 is rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

Claim 1 is narrative in form and replete with indefinite and functional or operational language. It lacks any positive recitation of structure. It is also unclear whether it is a method or product. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

Therefore, the claim is examined based on the best interpretation by the Examiner.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Tucker (U.S. Pat. No. 498,753).

Regarding claim 1, Tucker discloses beat balls (B) (see Fig. 2) for an entertaining rhythmic musical toy (Fig. 1; lines 16-20) which allows the player to generate a rhythmic appealing sound similar to that emitted by maracas (lines 24-37).

Art Unit: 2837

It is deemed that the rest of the claim is a recitation of the intended use of the claimed invention. It would have been obvious to one having ordinary skill in the art at the time the invention was made to produce a drum-like beat generated by knocking sound between the two beat balls upon contact. It has been held that a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963).
